**VIRTUAL WORLD AND SOCIAL NETWORKS PSYCHOLOGY  
SYLLABUS**

**Lecturer: Prof. IRINA ZINOVIEVA**

### Summary

The course on Virtual World and Social Networks Psychology presents the major changes in perception, memory, organisation of thought, learning strategies, personality, and self, due to virtual world participation. It covers a number of practical applications such as virtual self-presentation, identity shift, and accumulation of social capital. Special attention is paid to decision-making - both on personal and professional matters - with and without social networks as well as to advertising and doing business in social media.

| Topic  | Workload (hours) |
|--|------------------|
| 1. Hedonic regulation of Internet behaviour. Pleasure hunting. Unlimited choice. Propensity for rule braking. Procrastination. | 4                |
| 2. Changes in human perception, and memory.  | 4                |
| 3. Changes in learning strategies in the virtual world.  | 4                |
| 4. Consequences of continuous connectedness. Opportunities and treats.   | 4                |
| 5. Differences between the real-life and virtual Self. Identity shift. Virtual identity capital.                               | 4                |

|  |   |
|--|---|
| 6. Ubiquitous connectivity and Relational Self. Theory and evidence.   | 4 |
| 7. Living in alternative worlds and maintaining alternative selves.  | 4 |
| 8. Social networks. Self-presentation in social networks. Self-presentation in embedded contexts.  | 4 |
| 9. Navigating collapsed contexts and privacy.  | 4 |
| 10. Emotional contagion in social networks. Emotional intelligence in internet environment.  |   |
| 11. Computer games as precursors of virtual social networks. Advantages gained from computer game participation.   | 4 |
| 12. Decision-making for personal matters with social networks.   | 4 |
| 13. Virtual communities for personal and professional purposes: advantages and disadvantages of on-line communication. Personality traits facilitating virtual team performance. Trust in virtual communities. | 4 |
| 14. Doing business in social networks. New professions and implications for the existing ones. Advertising with the aid of social networks.  | 4 |
| 15. Decision-making for professional matters - with and without social networks.   | 4 |
